PROFESSIONAL SUMMARY

Full-stack developer specializing in Angular, Laravel, and Firebase. Delivered marketing websites and admin dashboards that support registration, ordering, and payment workflows. Comfortable owning features end-to-end: database design, REST APIs, real-time data, responsive UI, and production deployment.

CORE COMPETENCIES

- Admin dashboards (multi-role access, operational workflows, reporting).
- E-commerce flows (catalog, cart/checkout, orders) and payment-gateway integrations.
- Real-time features using Firebase (Realtime Database / Firestore) for live updates and notifications.
- Backend architecture with Laravel (REST APIs, authentication, performance, maintainability).
- Deployment and production support (Vercel, cPanel, VPS, IIS).

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, responsive UI.

Backend: Laravel (PHP), REST API design, authentication/authorization.

Databases: MySQL, Firebase Realtime Database, Firestore.

Cloud & DevOps: Firebase (Auth, FCM), Git/GitHub, CI/CD basics, deployment on Vercel, cPanel, VPS, IIS.

Tools: Debugging, API testing, issue tracking, release management.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Project-Based Delivery

- Built and maintained Angular front-ends and Laravel/Firebase back-ends for production platforms and dashboards.
- Implemented operational modules such as user management, roles/permissions, order management, and reporting views.
- Integrated payment workflows where required (checkout, payment confirmation, order status lifecycle).
- Shipped responsive UI with consistent UX patterns across marketing pages and admin portals.
- Handled deployment, environment configuration, and post-release fixes in live environments.

EDUCATION

Islamic University of Gaza — Bachelor's Degree
in Software Development

Graduated: 2024 — Gaza, Palestine

LANGUAGES

- Arabic (Native)
- English (Good)

SELECTED PROJECTS

Production platforms and dashboards delivered end-to-end (frontend, backend/APIs, deployment).

Elev8 Club —

<https://elevn-club.vercel.app/#/home>

Marketing platform for trading courses with registration and an internal dashboard.

Tech: Angular • Firebase

Highlights: Landing experience optimized for marketing and lead capture; Dashboard to manage course-related content and user journeys.

EDKD — <https://edkd.net/home>

Marketing and ordering website for kidney-testing medicines, including an admin dashboard.

Tech: Angular • Laravel • Payment Gateway

Highlights: Order lifecycle management (submission, status updates, customer follow-up); Payment workflow connected to a payment gateway.

Dorrance —

<https://dorrance-new.nstechs.net/home>

AI-assisted eBook and audiobook platform with e-commerce, author portal, and admin panel.

Tech: Angular • Backend APIs • Payments • AI workflows

Highlights: E-commerce bookstore (browse, purchase, and access purchased content); Author audio portal to create and publish audio/ebook content.

Auraline — <https://auralinesolution.com/>

IT company website showcasing services and job postings, with a management dashboard.

Tech: Angular • Laravel

Highlights: Service and jobs pages with structured content management; Admin dashboard for publishing and maintaining site content.

Turpo-Eat (Dashboard Only)

Food delivery administration dashboards: platform admin + restaurant dashboards.

Tech: Angular • Admin Dashboards

Highlights: Multi-tenant dashboards for admin and restaurants; Order tracking and management views for day-to-day operations.

Fit Row — <https://fitrow.work/>

Complete gym management platform with trainer dashboards, subscriptions, packages, and analytics.

Tech: Angular • Backend APIs • Analytics

Highlights: Trainer dashboards and user management workflows; Subscription models and bundled packages.

PRCS (Dashboard Only)

Aid distribution and warehouse management dashboard for Palestinian Red Crescent Society.

Tech: Angular • Admin Dashboards

Highlights: Inventory/warehouse operations and distribution tracking; Structured workflows to support coordination with partner organizations.

Eazy Go (Dashboard Only)

Uber-like fleet and ride management dashboard (vehicles, trips, dispatch, reporting).

Tech: Angular • Admin Dashboards

Highlights: Fleet and vehicle management modules; Trips/dispatch operations and reporting views.
